### **DETAILED ACTION**

Claims 1-10 are pending. This Action is responsive to applicants' response filed August 26, 2003.

#### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 6-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The reference to "as stabilizer B" lacks antecedent basis in claim 1.

#### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-2, 4, and 7-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Henkel, DE 28 51 832 (cited in IDS), as evidenced by Derwent Abstract 1980-45188C. Henkel (Derwent Abstract) discloses foam inhibitors reading on the claimed materials for use in resin dispersions. Henkel (Table 1, page 10) discloses, at least as S<sub>6</sub>, a compound reading on the claimed materials. Henkel (Derwent Abstract) discloses the materials are used in concentrations of 0.1 to 5 %. Henkel (page 13, examples 17 and 18) disclose the addition of foam inhibitors S<sub>1</sub> or S<sub>2</sub> in an oily mixture containing ethoxylated alcohol into a 25% by weight dispersion of polyvinylacetate. See Henkel page 9, lines 25-37 for suitable polymer types to be treated.

At the point of addition, the foam inhibitor composition would have been dispersed as an oil in water emulsion due to the hydrophobic nature of the foam inhibitor ingredients.

Henkel differs from the claims in the exemplified use of the instantly claimed materials as the foam inhibitor.

It would have been obvious to one of ordinary skilled in the art at the time of applicants' invention to employ the specific species, S<sub>6</sub>, disclosed in the Henkel reference as obvious functional equivalent foam inhibitor species in the resin dispersions as disclosed in the Henkel reference.

***Allowable Subject Matter***

6. Claims 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter: claim 3 is distinguished from the prior art since it requires component (b1) and (b2), which are not fairly suggested in the prior art. Claims 5-6 are distinguished from the prior art in the incorporation of 0.1 to 3% by weight of a polymeric stabilizer.

***Response to Arguments***

9. Applicant's arguments with respect to claims 1-10 have been considered but are moot in view of the new ground(s) of rejection.
